Work Experience

Exact Staff – Web Developer

March 2020 – April 2022

- Design and develop the Front end of a job board using NextJS and GraphQL to increase engagement with associates and increase matches between candidates and employers.
- Maintain and update a training web portal using ReactJS, Typescript, GraphQL to simplify the onboarding of 3000+ associates' completion of California-required training.
- Development of a signage system using Electron and React to provide daily updates on open positions to 20+ offices.
- Maintain and update Exact Staff's corporate website built using WordPress and increased conversion by 26%

Exact Staff – IT Specialist

October 2018 – March 2020

- Serve as the first point of contact for internal and external users seeking technical assistance over the ticketing system (Freshdesk) or phone and email as necessary.
- Microsoft Active Directory and Office 365 account administration and configuration.
- Assist the CEO, Directors, and upper management with special projects as needed.
- Write SQL business reports to provide business information to the CEO, Directors, upper management, and clients.
- Install, configure, and perform repairs to hardware, and software.

Educational Opportunity Program – Academic Mentor

June 2016 – May 2017

- Mentor incoming first-time freshman students and provides resources for academic success.
- Facilitates daily meetings with 26 students to promote community building, teamwork, and promote values such as Respect, Responsibility, Attitude, and Maturity.
- Collaborate with academic Mentors to coordinate events, and weekly meetings to ensure students are not falling behind and provide supplemental help. (personal/academic)
